Plant Science, 62 (1989) 273–275
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 62 (1989)

Acid growth, hemicellulose, molecular weight, pectin, xyloglucan, 53
Acid phosphatase, *Triticum aestivum*, gramineae, embryo-less wheat half-seeds, enzyme regulation by GA_3, de novo synthesis, enzyme purification, 1
Acid phosphatases, glycoproteins, Con A-binding enzymes, immunological relationship, *Lupinus*, dicotyledonous, 37
Agrobacterium tumefaciens, Ti plasmid, *vir* gene induction, flavonoids, pollen gene transfer, 83
Alfalfa mosaic virus, chitosan, bean, an inhibitor of virus infection, 29
Androgenesis in vitro, in vitro shoots, thin epidermal cell layers, precocity, origin of the explant, viable plants, 113
An inhibitor of virus infection, chitosan, bean, alfalfa mosaic virus, 29
Arginine decarboxylase, organogenesis, putrescine, spermidine, ornithine decarboxylase, polyamine-inhibitors, 123

Barley, *Rhynchosporium secalis*, phytotoxic glycoprotein, HPLC, in vivo toxin production, 165
Barley, stress proteins, F_1 hybrids, 147
Bean, chitosan, alfalfa mosaic virus, an inhibitor of virus infection, 29
Brimeura amethystina, cytophotometry, somatic embryogenesis, 255

Carrot callus, ethane, ethylene, substituted phenols, 33
Cell division, pollen, protoplast culture, *Hemerocallis fulva*, 229
Cell suspension culture, *Theobroma cacao*, lipids, temperature and fatty acids, 217
Chitosan, bean, alfalfa mosaic virus, an inhibitor of virus infection, 29
Chloroplast DNA, structural organization, minicircle DNA, electron microscopy, RNA polymerase, 93
Citrus, maturation, electrophoresis, immunoblotting, TLC, glucose, cold-hardening, 157
Cocos nucifera, immature embryo, somatic embryogenesis, embryogenic callus, cotyledon, postanthesis, 247
Cold-hardening, *Citrus*, maturation, electrophoresis, immunoblotting, TLC, glucose, 157
Conifer, *Picea mariana*, tissue culture, plant growth regulator, rejuvenation, plantlet, 129
Con A-binding enzymes, acid phosphatases, glycoproteins, immunological relationship, *Lupinus*, dicotyledonous, 37
Cotyledon, *Cocos nucifera*, immature embryo, somatic embryogenesis, embryogenic callus, postanthesis, 247
Cytophotometry, *Brimeura amethystina*, somatic embryogenesis, 255

DCMU, plasmalemma proton pump, *Elodea densa* leaves, vesicles, 21
Density gradient, rice (*Oryza sativa*), protoplast, purification, regeneration, 237
De novo synthesis, *Triticum aestivum*, gramineae, embryo-less wheat half-seeds, acid phosphatase, enzyme regulation by GA_3, enzyme purification, 1
Dicotyledonous, acid phosphatases, glycoproteins, Con A-binding enzymes, immunological relationship, *Lupinus*, 37

Electron microscopy, chloroplast DNA, structural organization, minicircle DNA, RNA polymerase, 93
Electrophoresis, *Citrus*, maturation, immunoblotting, TLC, glucose, cold-hardening, 157
Elodea densa leaves, plasmalemma proton pump, vesicles, DCMU, 21
Embryo-less wheat half-seeds, *Triticum aestivum*, gramineae, acid phosphatase, enzyme regulation by GA_3, de novo synthesis, enzyme purification, 1
Embryogenic callus, *Cocos nucifera*, immature embryo, somatic embryogenesis, cotyledon, postanthesis, 247
Endoproteolytic cleavage, *Lathyrus nissolia* isolectins, single- and two-chain *Vicieae* lectins, 181
Endosperm, enzyme, immobilized pH gradient, protein, systematics, *Vitis*, 73
Enzyme, endosperm, immobilized pH gradient, protein, systematics, *Vitis*, 73
Enzyme purification, *Triticum aestivum*, gramineae, embryo-less wheat half-seeds, acid phosphatase, enzyme regulation by GA_3, de novo synthesis, 1
Enzyme regulation by GA_3, *Triticum aestivum*, gramineae, embryo-less wheat half-seeds, acid phosphatase, de novo synthesis, enzyme purification, 1
Ethane, carrot callus, ethylene, substituted phenols, 33
Ethylene, carrot callus, ethane, substituted phenols, 33

F_1 hybrids, stress proteins, barley, 147
Flavonoids, *Agrobacterium tumefaciens*, Ti plasmid, *vir* gene induction, pollen gene transfer, 83
Flowering induction, gibberellic acid, plasmalemma, *Spinacia oleracea*, sterols, 63

Gene expression, wheat, HMW subunits, transgenic tobacco, 207

Genotype environment-interaction, *Solanum*, tissue culture, separability of effects, 137
Gibberellic acid, flowering induction, plasmalemma, *Spinacia oleracea*, sterols, 63
D-Gluconate, keto-D-gluconate (D-*xylo*-5-hexulosonate), *Phaseolus vulgaris* L., L-(+)-tartrate biosynthesis, 175
Glucose, *Citrus*, maturation, electrophoresis, immunoblotting, TLC, cold-hardening, 157
β-Glucuronidase, translation initiation, transient expression, Kozak's scanning model, 199
Glycoproteins, acid phosphatases, Con A-binding enzymes, immunological relationship, *Lupinus*, dicotyledonous, 37
Graminease, *Triticum aestivum*, embryo-less wheat half-seeds, acid phosphatase, enzyme regulation by GA_3, de novo synthesis, enzyme purification, 1
Greening and light acclimation, Rubisco, mRNA, photomixotrophic cell suspension, tobacco, 191

Helianthus annuus, α-mannosidase isoforms, purification, properties, 11
Hemerocallis fulva, pollen, protoplast culture, cell division, 229
Hemicellulose, acid growth, molecular weight, pectin, xyloglucan, 53
HMW subunits, wheat, gene expression, transgenic tobacco, 207
HPLC, *Rhynchosporium secalis*, barley, phytotoxic glycoprotein, in vivo toxin production, 165

Immature embryo, *Cocos nucifera*, somatic embryogenesis, embryogenic callus, cotyledon, postanthesis, 247
Immobilized pH gradient, endosperm, enzyme, protein, systematics, *Vitis*, 73
Immunoblotting, *Citrus*, maturation, electrophoresis, TLC, glucose, cold-hardening, 157
Immunological relationship, acid phosphatases, glycoproteins, Con A-binding enzymes, *Lupinus*, dicotyledonous, 37
In vitro shoots, thin epidermal cell layers, precocity, origin of the explant, androgenesis in vitro, viable plants, 113
In vivo toxin production, *Rhynchosporium secalis*, barley, phytotoxic glycoprotein, HPLC, 165

Jasmonic acid, phytohormones, soybean, vegetative storage protein, 45

5-Keto-D-gluconate (D-*xylo*-5-hexulosonate), D-gluconate, *Phaseolus vulgaris* L., L-(+)-tartrate biosynthesis, 175
Kozak's scanning model, β-glucuronidase, translation initiation, transient expression, 199

Lathyrus nissolia isolectins, endoproteolytic cleavage, single- and two-chain *Vicieae* lectins, 181
Lipids, *Theobroma cacao*, cell suspension culture, temperature and fatty acids, 217
Lupinus, acid phosphatases, glycoproteins, Con A-binding enzymes, immunological relationship, dicotyledonous, 37

Macrocystis pyrifera, protoplasts, surface/cortical cells, microcalluses, 105
α-Mannosidase isoforms, *Helianthus annuus*, purification, properties, 11
Maturation, *Citrus*, electrophoresis, immunoblotting, TLC, glucose, cold-hardening, 157
Microcalluses, *Macrocystis pyrifera*, protoplasts, surface/cortical cells, 105
Minicircle DNA, chloroplast DNA, structural organization, electron microscopy, RNA polymerase, 93
Molecular weight, acid growth, hemicellulose, pectin, xyloglucan, 53
mRNA, Rubisco, greening and light acclimation, photomixotrophic cell suspension, tobacco, 191

Nicotiana sylvestris, protoplast fusion, selectable markers, triple resistant plant, *Nicotiana tabacum*, 263
Nicotiana tabacum, protoplast fusion, selectable markers, triple resistant plant, *Nicotiana sylvestris*, 263

Organogenesis, putrescine, spermidine, arginine decarboxylase, ornithine decarboxylase, polyamine-inhibitors, 123
Origin of the explant, in vitro shoots, thin epidermal cell layers, precocity, androgenesis in vitro, viable plants, 113
Ornithine decarboxylase, organogenesis, putrescine, spermidine, arginine decarboxylase, polyamine-inhibitors, 123

Pectin, acid growth, hemicellulose, molecular weight, xyloglucan, 53
Phaseolus vulgaris L., D-gluconate, keto-D-gluconate (D-*xylo*-5-hexulosonate), L-(+)-tartrate biosynthesis, 175
Photomixotrophic cell suspension, Rubisco, mRNA, greening and light acclimation, tobacco, 191
Phytohormones, jasmonic acid, soybean, vegetative storage protein, 45
Phytotoxic glycoprotein, *Rhynchosporium secalis*, barley, HPLC, in vivo toxin production, 165
Picea mariana, conifer, tissue culture, plant growth regulator, rejuvenation, plantlet, 129
Plantlet, conifer, *Picea mariana*, tissue culture, plant growth regulator, rejuvenation, 129
Plant growth regulator, conifer, *Picea mariana*, tissue culture, rejuvenation, plantlet, 129
Plasmalemma, flowering induction, gibberellic acid, *Spinacia oleracea*, sterols, 63
Plasmalemma proton pump, *Elodea densa* leaves, vesicles, DCMU, 21
Pollen, protoplast culture, cell division, *Hemerocallis fulva*, 229
Pollen gene transfer, *Agrobacterium tumefaciens*, Ti plasmid, *vir* gene induction, flavonoids, 83
Polyamine-inhibitors, organogenesis, putrescine, spermidine, arginine decarboxylase, ornithine decarboxylase, 123

Postanthesis, *Cocos nucifera*, immature embryo, somatic embryogenesis, embryogenic callus, cotyledon, 247
Precocity, in vitro shoots, thin epidermal cell layers, origin of the explant, androgenesis in vitro, viable plants, 113
Properties, *Helianthus annuus*, α-mannosidase isoforms, purification, 11
Protein, endosperm, enzyme, immobilized pH gradient, systematics, *Vitis*, 73
Protoplast, rice (*Oryza sativa*), purification, density gradient, regeneration, 237
Protoplasts, *Macrocystis pyrifera*, surface/cortical cells, microcalluses, 105
Protoplast culture, pollen, cell division, *Hemerocallis fulva*, 229
Protoplast fusion, selectable markers, triple resistant plant, *Nicotiana tabacum*, *Nicotiana sylvestris*, 263
Purification, *Helianthus annuus*, α-mannosidase isoforms, properties, 11
Purification, rice (*Oryza sativa*), protoplast, density gradient, regeneration, 237
Putrescine, organogenesis, spermidine, arginine decarboxylase, ornithine decarboxylase, polyamine-inhibitors, 123

Regeneration, rice (*Oryza sativa*), protoplast, purification, density gradient, 237
Rejuvenation, conifer, *Picea mariana*, tissue culture, plant growth regulator, plantlet, 129
Rhynchosporium secalis, barley, phytotoxic glycoprotein, HPLC, in vivo toxin production, 165
Rice (*Oryza sativa*), protoplast, purification, density gradient, regeneration, 237
RNA polymerase, chloroplast DNA, structural organization, minicircle DNA, electron microscopy, 93
Rubisco, mRNA, greening and light acclimation, photomixotrophic cell suspension, tobacco, 191

Selectable markers, protoplast fusion, triple resistant plant, *Nicotiana tabacum*, *Nicotiana sylvestris*, 263
Separability of effects, genotype environment-interaction, *Solanum*, tissue culture, 137
Single- and two-chain *Vicieae* lectins, *Lathyrus nissolia* isolectins, endoproteolytic cleavage, 181
Solanum, genotype environment-interaction, tissue culture, separability of effects, 137
Somatic embryogenesis, *Brimeura amethystina*, cytophotometry, 255
Somatic embryogenesis, *Cocos nucifera*, immature embryo, embryogenic callus, cotyledon, postanthesis, 247
Soybean, phytohormones, jasmonic acid, vegetative storage protein, 45
Spermidine, organogenesis, putrescine, arginine decarboxylase, ornithine decarboxylase, polyamine-inhibitors, 123
Spinacia oleracea, flowering induction, gibberellic acid, plasmalemma, sterols, 63
Sterols, flowering induction, gibberellic acid, plasmalemma, *Spinacia oleracea*, 63
Stress proteins, F_1 hybrids, barley, 147
Structural organization, chloroplast DNA, minicircle DNA, electron microscopy, RNA polymerase, 93
Substituted phenols, carrot callus, ethane, ethylene, 33
Surface/cortical cells, *Macrocystis pyrifera*, protoplasts, microcalluses, 105
Systematics, endosperm, enzyme, immobilized pH gradient, protein, *Vitis*, 73

L-(+)-Tartrate biosynthesis, D-gluconate, keto-D-gluconate (D-*xylo*-5-hexulosonate), *Phaseolus vulgaris* L., 175
Temperature and fatty acids, *Theobroma cacao*, cell suspension culture, lipids, 217
Theobroma cacao, cell suspension culture, lipids, temperature and fatty acids, 217
Thin epidermal cell layers, in vitro shoots, precocity, origin of the explant, androgenesis in vitro, viable plants, 113
Tissue culture, conifer, *Picea mariana*, plant growth regulator, rejuvenation, plantlet, 129
Tissue culture, genotype environment-interaction, *Solanum*, separability of effects, 137
Ti plasmid, *Agrobacterium tumefaciens*, *vir* gene induction, flavonoids, pollen gene transfer, 83
TLC, *Citrus*, maturation, electrophoresis, immunoblotting, glucose, cold-hardening, 157
Tobacco, Rubisco, mRNA, greening and light acclimation, photomixotrophic cell suspension, 191
Transient expression, β-glucuronidase, translation initiation, Kozak's scanning model, 199
Transgenic tobacco, wheat, HMW subunits, gene expression, 207
Translation initiation, β-glucuronidase, transient expression, Kozak's scanning model, 199
Triple resistant plant, protoplast fusion, selectable markers, *Nicotiana tabacum*, *Nicotiana sylvestris*, 263
Triticum aestivum, gramineae, embryo-less wheat half-seeds, acid phosphatase, enzyme regulation by GA_3, de novo synthesis, enzyme purification, 1

Vegetative storage protein, phytohormones, jasmonic acid, soybean, 45
Vesicles, plasmalemma proton pump, *Elodea densa* leaves, DCMU, 21
Viable plants, in vitro shoots, thin epidermal cell layers, precocity, origin of the explant, androgenesis in vitro, 113
Vir gene induction, *Agrobacterium tumefaciens*, Ti plasmid, flavonoids, pollen gene transfer, 83
Vitis, endosperm, enzyme, immobilized pH gradient, protein, systematics, 73

Wheat, HMW subunits, gene expression, transgenic tobacco, 207

Xyloglucan, acid growth, hemicellulose, molecular weight, pectin, 53

Plant Science, 62 (1989) 277 – 278
Elsevier Scientific Publishers Ireland Ltd.
